SUMMARY

Engineering lead who builds teams and the platforms they ship on. At webook.com, leads a frontend team of 10+ engineers and owns the shared platform behind 24+ production apps - ticketing for the AFC Asian Cup 2027, Riyadh Season, the F1 Saudi Arabian GP, and more. Creator and sole architect of CMS Cloud, a headless CMS serving three production brands at over 3M requests a day from a multi-region Google Cloud deployment built for GDPR and PDPL residency. Full-stack across Fastify, PostgreSQL and Redis on the back end and React/Next.js on the front. Maintainer of an open-source React scheduler with 10k+ downloads a month.

WORK EXPERIENCE

Senior Frontend Engineer / Team Lead, Halayalla / webook.com

2022/10 - Present | Riyadh, Saudi Arabia

- Led the team's move from a repo-per-project model to a single Turborepo monorepo with shared packages — the architecture that now powers every project and white-label, replacing a separate codebase per client.
- Own the shared @wbk/* platform built out of that migration — 30 packages spanning auth, payments, ticketing, flights, hotels and the design system — adopted across 24 production apps, cutting new white-label launches from weeks to days.
- Lead a 10+ engineer frontend team, built largely through my own hiring; mentored most to senior level, and two now lead their own squads.
- Plan and break down work with PMs, set the team's development standards, and run code review across the group.
- Delivered ticketing platforms for the AFC Asian Cup Saudi Arabia 2027 (ahlan.sa), Riyadh Season, the F1 Saudi Arabian GP, the FIFA Club World Cup and Alawwal Park, Misk events hub, SC Braga, and more.

CMS Cloud — creator and architect

2025/08 - Present · cmscloud.ai

- Designed and built a self-hosted, API-first headless CMS end to end as its sole architect and engineer — admin dashboard, three backend services, delivery layer and infrastructure — now runs commercially and is adopted by three production brands (webook.com, ahlan.sa, scbraga.pt) so far.
- Split delivery into independent Fastify services: a read-only GraphQL API, a REST management API and an admin API over PostgreSQL, Redis and Cloudflare Workers that cache GraphQL at the edge and transform images on the fly.
- Sustains >3M content API requests a day at sub-40ms average and 92ms p95, using three-layer caching with stale-while-revalidate and Redis pub/sub invalidation.
- Architected the Google Cloud topology — GKE, Cloud SQL, Memorystore, Cloud Storage and Cloud Load Balancing — across multiple zones and regions, so each customer's content is pinned to the region its regulator requires — one platform satisfying both GDPR and PDPL.
- Built dual-layer search: self-hosted Meilisearch for lexical matching, OpenAI embeddings in pgvector for semantic meaning.

Fullstack Web Developer, Bayader Aljazeera

2020/11 - 2022/09 | Riyadh, Saudi Arabia

- Architected and built a cloud-based automated quotation system that replaced a manual pricing process across the business.
- Full stack ownership on Node, Express, MySQL and React/Next, deployed and maintained on self-managed VPS infrastructure.
- Shipped bayaderpack.com, db.bayaderpack.com and future-pack.com.

Frontend Developer, Wakaed for IT

2019/08 - 2020/10 | Unayzah, Saudi Arabia

- Built and maintained client web platforms in React, Next and React Native, including wakaed.com, unayzah.com and europeanhoney.com.

Co-founder, Stem Cell Medical Center

2015/05 - 2019/03 | Amman, Jordan

- Ran operations and led the center's digital transformation.

Software Engineer, Beijing Puhua International Medical Group
2012/05 - 2015/04 | Beijing, China

- Built the group's hospital websites and the internal staff, e-appointments and e-files systems in Java, JavaScript and MySQL.

SKILLS

Platform & Backend: Node.js, Fastify, NestJS, Express, GraphQL, REST, PostgreSQL, Drizzle, Redis, BullMQ, Meilisearch, Docker

Frontend: TypeScript, React, Next.js, Vite, TailwindCSS, Radix UI, Ant Design, TanStack Query, i18n & RTL, PWA

Infrastructure & Delivery: Google Cloud (ACE certified) — GKE, Cloud SQL, Memorystore, Cloud Storage; Cloudflare Workers, Turborepo, CI/CD, Datadog, Sentry, Vitest, Jest, Cypress

SELECTED PROJECTS

CMS Cloud — cmscloud.ai — Headless CMS platform — Fastify, GraphQL, PostgreSQL, Redis, Google Cloud, Cloudflare Workers.

Ahlan — AFC Asian Cup Saudi Arabia 2027 — ahlan.sa — Official tournament platform; CMS-driven theming, ticket resale, flights and hotels.

Ala Khutah — alakhutah.com — Heritage destination booking — entry, experiences, hotels and transport in one cart.

webook.com — webook.com — Saudi Arabia's ticketing platform — React, Next.js, TailwindCSS.

Riyadh Season 2023/24 — riyadhseason.com — Season-wide event and ticketing site — Next.js, TailwindCSS.

F1 Saudi Arabian GP — tickets.saudiarabiangp.com — Race ticketing with interactive seat maps — Next.js, TailwindCSS.

FIFA Club World Cup · Alawwal Park (Al Nassr FC) · MISK Event Hub — eventhub.misk.org.sa — Further ticketing and event platforms delivered on the shared architecture.

OPEN SOURCE

React Scheduler — github.com/aldabil21/react-scheduler — MUI scheduler component — 11.5k downloads/month, 417 stars, 150 forks.

Easy Web Push — github.com/aldabil21/opencart-easywebpush — Push notification and PWA extension for OpenCart 3.x.

EDUCATION

Beijing University of Science and Technology — Electronic and Information Engineering, 2008 - 2012

Beijing Language and Culture University — Mandarin language diploma, 2007 - 2008

CERTIFICATES

- Google Cloud Certified — Associate Cloud Engineer, 2026
- Oracle Certified Java 17
- Saudi Council of Engineers — ID 128832

LANGUAGES

Arabic (Native), English (Professional), Mandarin (Professional)
